

RECOMMENDATIONS FOR THE JEFFERSON COUNTY TREE PLANTERS

To have your tree planting go smoothly, please follow these recommendations carefully.

PLANTER OPERATION:

- 1) These planters are meant for seedling tree stock and do not work well for the evergreen transplant size trees Jefferson County offers through their LWCD tree sale program. These tree planters are ideal for the seedling tree stock sold through the Wisconsin DNR tree sale program or other private vendors selling seedling sized trees.
- 2) In order to properly use the tree planters, you will need a minimum of 40 hp tractor with standard hydraulic couplings.
- 3) Tree planters are classed as slow moving vehicles. A class II or III hitch with a 2" ball is recommended for towing.
